

Edward Chu

Staff Product Designer – Toronto, Canada & United States

ed@edwardchu.xyz | edwardchu.xyz | linkedin.com/in/edwardchu1

Summary

Staff Product Designer with deep experience designing complex enterprise and consumer products across fintech, healthcare, and AI platforms. Known for simplifying high-stakes, regulated workflows into clear, trusted user experiences. Strong track record leading 0-to-1 initiatives, influencing product direction without formal authority, and partnering closely with product, engineering, and executive teams to ship scalable systems.

Experience

Adopt AI – Founding Staff Product Designer | San Francisco | Oct 2024 – Present

- Led end-to-end 0-to-1 design of an AI Copilot platform embedded into enterprise SaaS products, defining core workflows, interaction models, and guardrails for safe execution
- Partnered closely with CEO, CTO, and ML engineers to define product strategy, system constraints, and execution boundaries
- Translated ambiguous customer needs and technical constraints into clear product decisions that balanced automation, control, and usability
- Designed workflow builders, permissioned actions, review states, and failure handling to support safe execution and user trust
- Established foundational design systems and processes to support rapid iteration across multiple customer implementations

SamaCare – Staff Product Designer | San Francisco | Aug 2022 – Sept 2024

- Sole product designer for a healthcare SaaS platform managing prior authorization, benefit verification, and enrollment workflows for enterprise practices
- Designed complex, state-heavy, multi-role workflows in a regulated environment to reduce administrative burden and operational risk
- Led discovery, prototyping, and usability testing to simplify decision paths, information hierarchy, and overall system status clarity
- Partnered with product, engineering, and executive leadership to shape roadmap priorities during the company's Series B growth phase
- Helped scale the platform through Series B by improving end-to-end workflow clarity and reducing operational friction for enterprise practices

Kea.ai – Staff Product Designer / Head of Product Design | San Francisco | Mar 2021 – Jul 2022

- Led design for the company’s core operations console supporting a B2B2C platform used by multiple internal and external user roles
- Conducted in-depth user research to understand operational workflows and design scalable admin and monitoring interfaces
- Built the company’s first design system and established reusable interaction patterns to support long-term product scalability
- Designed early voice UX patterns and AI-assisted interfaces to support hands-free and proactive workflows

Flybits – Product Design Manager | Toronto | Jul 2020 – Mar 2021

- Managed and mentored a team of five designers across multiple product initiatives
- Established cross-functional design processes, UX writing standards, and accessibility audits (WCAG AA)

Tier1 Financial Solutions (acquired by SS&C) – UX Manager | Toronto | Jan 2017 – Apr 2020

- First designer hired; built and led a UX team of five designers across multiple institutional fintech products
- Led design of SaaS, web, and mobile platforms used by enterprise financial clients
- Created a unified design system and shared interaction patterns to improve consistency across a fragmented product suite
- Partnered with strategy and senior leadership to define future product vision and platform direction
- Design contributions supported \$34M in funding and industry recognition including Deloitte Fast 500 and Buy-Side Technology awards

Education

Master of UX Design – Maryland Institute College of Art, Baltimore

Bachelor of Advertising & Graphic Design – OCAD University, Toronto
